1. BY SUBLINGUAL ADMINISTRATION

2. BY BUCCAL ADMINISTRATION

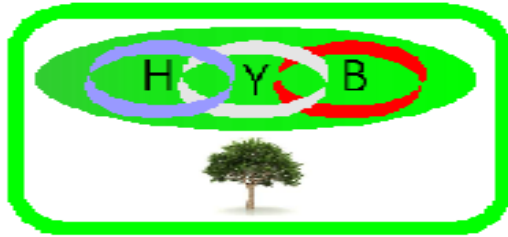

- Place the supplement between your gums and cheek, where it also dissolves and is absorbed into your blood.

Advantages

A) The supplement is absorbed under the tongue or between the cheek and gum and can be easier to take for people who have problems swallowing pills.

B) The supplement gets into your system quickly.

C) The cheek and area under the tongue have many capillaries, or tiny blood vessels. There, the supplement can be absorbed directly into the bloodstream before going to your digestive system.
